**Government of South Australia**  
Department for Education

Plympton International College is a co-educational learning community with three sub schools; **Primary:** reception to year 6, **Middle:** year 7 to year 9, and **Senior Secondary:** year 10 to year 12, providing a unique and seamless education. We pride ourselves on delivering high quality teaching and learning that is personalised for all students. We build on individual strengths and abilities, while supporting students to be challenged and academically stretched.

As the first bilingual college in South Australia, our students have the opportunity to become fluent in both English and Chinese language. We pride ourselves on being a centre of excellence in learning and language education, by upholding a culture of high expectations, support and achievement. We foster intercultural understanding and global citizenship through our bilingual partnerships.

Our college is a specialist centre for innovation in Science, Technology, Engineering and Mathematics (STEM). Significant government funding has enabled the college to develop and acquire state of the art facilities and resources. Using advanced technologies combined with specialised teaching methodologies our students engage in inquiry-based learning, applying critical and creative thinking strategies to solve contemporary global issues. Working in partnership with industry and universities, our students are immersed in rich and deep learning opportunities, developing transferable skills and capabilities relevant to their future pathways.

Our secondary college is leading education in the health and medical science field. With our unique industry-standard medical training facility, we provide a range of learning opportunities to stretch and inspire young peoples' future directions. Partnering with the University of South Australia staff and facilities, we ensure students access relevant curriculum linked to post school pathways in diverse health and medical fields.

In addition to specialist offerings and formal curriculum based on Australian Curriculum and the South Australian Certificate of Education (SACE), our students benefit from engaging in an extensive range of co-curricular activities. Students are encouraged to be an active member of our college community through a range of activities including: student voice (SRC), youth forums, academic competitions, debating, performing arts, camps, lunchtime clubs, international exchange programs, zone and school sports.

As a community we provide a warm, caring and vibrant place creating global opportunities for all students. Our commitment and consistent, collaborative approach ensures that all learners are given the best opportunity to succeed. We warmly welcome you into our college and community.
